FACT FILES

ANTHONY J. WATTS

The concept of the cruiser has developed from the fast scout preceding the main fleet and supporting destroyer squadrons to its subsequent function as a unit designed for commerce warfare, either in a defensive or offensive role. As such the cruiser has failed to capture the attention that the mighty battleship has, or the greyhound of the oceans, the destroyer. Nevertheless the cruiser has also played a vital role in naval strategy and tactics. This Fact File covers every class of cruiser operated or planned by the Axis powers together with a short background to the design. Tables list the technical data and a brief note of the fate of each vessel.
